

EDUCATION

- National Institute of Technology, Silchar** Assam, India
B.Tech in Civil Engineering; CGPA: 7.83 2023 – Present
- Sarala Birla Gyan Jyoti** Guwahati, India
Higher Secondary Certificate (HSC); 86% 2020 – 2022

INTERNSHIP AND HACKATHON EXPERIENCE

- Machine Learning Research Intern, NIT Silchar** Remote
Satyendra Nath Bose Program (Intelligent Traffic Volume Prediction System) 06/2025 – 07/2026
 - Traffic Forecasting Platform:** Developed an end-to-end ML-based traffic volume prediction system using Python, XGBoost, and Scikit-learn on multimodal traffic and weather datasets
 - Feature Engineering & Model Optimization:** Engineered temporal and weather-based features; optimized Regression and Ensemble models using cross-validation and hyperparameter tuning
 - Real-Time Prediction Pipeline:** Built FastAPI-powered REST services and automated ML pipelines for real-time traffic forecasting and intelligent transportation analytics
- Urban Vision Hackathon – IISc Bangalore** Remote
Participant 05/2025 – 06/2025
 - Dataset Development:** Developed large-scale traffic dataset using computer vision annotation, processing 10k+ images for smart city initiatives
 - Team Collaboration:** Collaborated on AI models, improving data accuracy

PROJECTS

PORTFOLIO

- Advanced SQL Data Warehouse Project** [Github Link](#)
PostgreSQL, ETL Pipelines, Data Warehousing, Star Schema, Advanced SQL 2026
Built an end-to-end SQL data warehouse in PostgreSQL using Bronze, Silver, and Gold layer architecture.
Integrated ERP and CRM data, designed star schema models with optimized fact and dimension tables.
Developed advanced SQL analytics modules for customer segmentation, cohort analysis, and product performance reporting.
- Swiggy Sales Analysis** [Github Link](#)
Python, PostgreSQL, Power BI, ETL, Data Analytics 2026
Built an end-to-end analytics project analyzing 600,000+ food delivery orders across 10 Indian cities.
Designed ETL pipelines, star schema models, and performed advanced data visualisation with Python EDA.
Developed a 7-page interactive Power BI dashboard solving customer retention and revenue optimization challenges.
- Credit Card Transaction Analysis** [Github Link](#)
Power BI, SQL, DAX, Power Query, Data Analytics 2026
Built an interactive Power BI and SQL dashboard to analyze credit card transactions and customer spending patterns.
Implemented DAX measures and Power Query transformations for real-time KPI and revenue tracking.
Developed drill-through dashboards to monitor transaction trends and card-type performance across customer segments.

TECHNICAL SKILLS

- Programming Languages:** Python, C, C++,SQL, JavaScript
- Frameworks & Libraries:** TypeScript, Next.js, Prisma, LangChain, LangGraph, PostgreSQL, MongoDB
- Data Analysis & Machine Learning:** Pandas, NumPy, Matplotlib, Seaborn, Regression, Supervised & Unsupervised Learning, Regular Expressions(Regex), Data Modeling
- Tools & ETL:** Git, GitHub, Power BI, Excel, Postman, Jupyter Notebook, ETL Pipelines, Data Cleaning, Data Transformation
- Concepts:** Exploratory Data Analysis (EDA), KPI Analysis, RFM Analysis, Customer Lifetime Value (CLV), Data Visualization, Business Insights, Statistical Analysis, Quantitative Analysis
- Soft Skills:** Trading (1 Year), Data Storytelling, Analytical Thinking, Dashboard Development, Teamwork

LEADERSHIP & ACTIVITIES

- **Team Lead, Hackathon:** Led national-level hackathon project, coordinating team of 5 members
- **E-Cell Event Management:** Supported logistics and execution of 10+ events for entrepreneurship cell

CERTIFICATIONS

- **AWS Educate:** Machine Learning Foundations & Introduction to Generative AI
- **Deloitte:** Technology Job Simulation
- **HackerRank:** Software Engineer Intern Certification
- **Urban Vision Hackathon:** IISC Bangalore Participation
